

Our Company

Since more than 20 years CETA Testsysteme GmbH (located in Hilden nearby Duesseldorf) has been producing physical test devices for the measurement of leaks and flow rates. Throughout the world 2500 CETA test devices are already in use. These test devices are integrated in many industrial applications, mainly for quality control within the manufacturing process in full automatic production lines. Based on continuous product improvement and development of new solutions we present us as a qualified and competent partner for the industry.

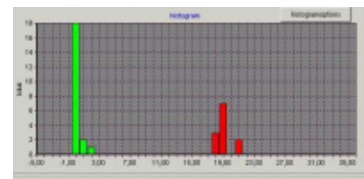

Our Products

- Leak testers with differential pressure sensor
- Leak testers with positive pressure sensor
- Leak testers with mass flow sensor
- Flow testers with laminar flow element
- Leak detection systems
- Accessories for leak test devices

Our Services

- Engineering
- Feasibility consideration
- User training
- Service (repair, maintenance, calibration)
- C_g- und C_{gk}-value-calculation

Our Calibration Services

- DKD calibration services for the measurand pressure
- Factory calibration services (pressure, flow rates)

Our Certifications

- DIN ISO 9001:2000
- DKD laboratory (DKD-K-36001)
- WEEE-Reg.-No. DE 61168724
- Patent for automatic function control (patent number 100 45 472)
- Quality award North Rhine-Westphalia 2002
- Conformance to the certification requirements of well-known industrial customers

Our Customers

- Automotive industry
- Medical technology
- Fittings industry
- Domestic appliances industry

Examples of parts tested with CETA test devices are listed on the reverse side.

Examples for parts tested with CETA test devices

- | | | |
|---|-----------------------------------|-----------------------------|
| ABS sensors | Electric razors | Photoelectric barriers |
| ABS valves | Electric toothbrushes | Pipes |
| Aerosol pumps | Engine blocks | Pistons |
| Air bag activators | Exhaust manifold | Plastic seals |
| Aluminium housings | Exhaust systems | Pneumatic seat controls |
| Antenna motors | Filter | Pneumatic valves |
| Anti-skid valves | Fire extinguishers | Power steering systems |
| Ball bearings | Fittings | Pre-burning chambers |
| Ball valves | Flow heaters | Pressure regulators |
| Batteries | Fuel injection ramps | Pumps |
| Belt tighteners | Fuel lines | Reflectors |
| Beverage containers | Gas fittings | Relays |
| Brake cylinders | Gas heating systems | Sanitary armatures |
| Brake lines | Gas pressure regulators | Sealing caps |
| Built-in fittings | Gas pressure springs | Sealing rings |
| Calorifiers | Gas ranges | Sensors |
| Carburettors | Gear shifts | Servo steering |
| Castings | Gears | Silencers |
| Catalytic converters | Halogen lights | Solenoid valve |
| Catheters | Headlamps | Steam irons |
| Central locking systems | Heat exchangers | Storage water heater |
| Clocks | Heating regulators | Sucking jet pumps |
| Clutch transducers | Hot water apparatus | Switches |
| Coffee machines | Housings for remote control units | Syringes |
| Compensator reservoirs for brakes and coolers | Hydraulic valves | Tanks |
| Compensators | Indicators | Text markers |
| Connectors | Injection valves | Thermometers |
| Cooler caps | Injectors | Thermos flasks |
| Cooler tubes | Ink cartridges | Thermostats |
| Coolers | Lambda probes | Toilet flushing valves |
| Cylinder heads | Lamps | Valve seats |
| Delivery pumps | Lighters | Valves for automobile tyres |
| Diesel injection systems | Microswitches | Water boilers |
| Door closers | Motors for windscreen wipers | Water pick |
| Drives | | Window lifts |
