

Hilden, August 2020

**CETA Testsysteme GmbH awarded label "Excellence Made in Germany CERTIFIED COMPANY"**

CETA Testsysteme GmbH has been awarded the label "*Excellence Made in Germany* CERTIFIED COMPANY" by the business portal "Die Deutsche Wirtschaft" (DDW). This label certifies CETA as a trustworthy and reliable business partner.

The award was granted after evaluation of 19 key figures and criteria. Besides basic commercial data, the ranking was determined according to further aspects such as investment in research and development, patents, innovative products, memberships, awards and cooperation. On the basis of these criteria, CETA was able to qualify for the excellence label.

*Managing Director Günter Groß, CETA Testsysteme GmbH*

On account of these data, CETA fulfils the conditions for inclusion in the TOP 10.000 DDW-ranking of the most important middle-sized companies in Germany ("Mittelstand 10.000"). Germany counts 3.5 million middle-sized companies (with up to 500 employees).

*"This is a very special distinction that honours our high standards for quality and performance as well as our constant pursuit of improvements and innovations",* says Günter Groß, owner and managing director of CETA Testsysteme GmbH.

CETA Testsysteme GmbH is the most important owner-managed German manufacturer of leak and flow testers (Made in Germany) based in Hilden near Düsseldorf. CETA has worked for more than 30 years as a solutions partner for industrial leak tests and flow measurements in production lines.

CETA's test devices are used for production assurance by renowned customers from the sectors of automotive industry, medical engineering, heating and air-conditioning technology, fittings and household appliances, packing industry and e-mobility.

CETA has been certified according to DIN ISO 9001 since 1999. In 2002, the company won the quality prize NRW for the industrial sector. CETA has consistently achieved a „very good credit rating“ ever since 2011. The calibration laboratory has been accredited since 2004 for the measurand pressure according to DIN EN ISO/IEC 17025 (DAkkS calibration laboratory D-K-19566). DAkkS calibration certificates are internationally recognised and comply among other things with the requirements of the standard IATF 16949 valid in the automotive industry. Thousands of CETA test devices are used all over the world and serviced by local international representatives.

## **CETA Testsysteme GmbH**

### **Solution Partner for Industrial Leak and Flow Tests**

The company CETA Testsysteme GmbH, based in Hilden near Düsseldorf, was founded in 1988 and has been manufacturing physical measurement devices for leak testing and flow measurement for over 30 years. The used test media are compressed air and hydrogen. These testing procedures are characterized by the fact that they can be integrated in the production line with high process reliability.

The test devices („Made in Germany“) are the company's own developments, and the components and accessories (such as calibration standards) are manufactured in-house. This ensures that the high quality requirements for the internal modules are met right from the start. Owing to a comprehensive range of test devices, it is possible to find the right solution for practically every test task.

The scope of products also includes semi-automatic test stands. The test devices are used by the customers for quality assurance, quality control and production assurance. The customers come mostly from the fields of automotive industry, medical technology, heating and air-conditioning industry, fittings and household appliances, packaging industry and e-mobility.

The company is certified according to DIN ISO 9001 and won in 2002 the quality award NRW for the category industry. The calibration laboratory was accredited in 2004 by the German Calibration Service (DKD) and in 2014 as DAkkS calibration laboratory by the German Accreditation Body (DAkkS) – successor of DKD. DAkkS calibration (in accordance with the standard DIN EN ISO/IEC 17025) complies with the requirements of the standard IATF 16949 valid in the automotive industry.

CETA Testsysteme GmbH is the first German manufacturer of leak testers whose devices have been delivered since 2004 with a DKD or DAkkS calibration certificate as standard feature. CETA has consistently achieved a very good credit rating ever since 2012.

The extensive services portfolio includes consulting, feasibility analysis, putting into operation, training, maintenance and calibration.

With cooperation partners in China, India, Indonesia, Korea, Mexico, Poland, Portugal, Singapore, Thailand, the Czech Republic, Turkey and Hungary as well as thousands of test devices in use all over the world, CETA Testsysteme GmbH presents itself as a competent solutions provider for industrial leak and flow testing.
