## **To the Business Partners of CETA Testsysteme GmbH**

Hilden, December 2023

### **Gradual Discontinuation of the Test Device Series CETATEST x15**

Dear CETA Business Partner,

After more than ten successful years with the leak tester series CETATEST x15, CETA is once again embarking on a path into an innovation-driven era with a new test equipment series designed to meet the changing and future market needs.

The successful launch of the differential pressure tester CETATEST 825 in 2022, the successor to the CETATEST 815, paved the way for this positive change. Now, in 2024, the CETATEST x15 series will be gradually replaced by the even more advanced and powerful CETATEST x25 series.

Standard versions of the leak tester series CETATEST 515, CETATEST 715, and CETATEST 815 can still be ordered until March 15, 2024 (please refer to the attachment on page 3 for more details). Maintenance, repairs, and supply of spare parts for the CETATEST x15 series are, of course, ensured in the long term.

The nearly price-equivalent leak testers of the CETATEST x25 series come with features such as pre-filling/smooth filling/pulsing and an Ethernet interface, which were previously associated with additional costs. Additionally, the interfaces are fully backward compatible with those of the CETATEST x15 series.

A 7" touch display, significantly higher-resolution AD conversion technology, enormous ease of operation, and a particularly user-friendly graphical user interface are just some of the advantageous technical specifications and features of the CETATEST x25 series. For more details, please refer to the [Data sheets](#), which we consistently make available for download.

Like the CETATEST x15 series, the CETATEST x25 series is delivered with a DAkkS-accredited calibration (in accordance with DIN EN ISO/IEC 17025) and a 3-year warranty with regular maintenance, at no additional cost. There is also an option to extend the warranty to 5 years.

Throughout 2024, when the corresponding successors of the CETATEST x25 series become available, the discontinuation of the mass flow tester CETATEST 615 and the flow tester CETATEST 915 can be anticipated.

We will keep you informed about the current availability status of our products on our website under [Product Discontinuation](#).

For any questions, we are always happy to advise and support you – a commitment that has been a longstanding tradition for CETA over the decades.

Be assured that we continue to focus consistently and passionately on meeting the ever-increasing demands of our business partners.

You are receiving this letter because you are registered as one of our main contacts in our ERP system. If this information is also relevant to other persons in your company, we kindly ask you to share this letter internally.

We look forward to continuing our business partnership and greatly appreciate your trust in CETA.

Yours sincerely

CETA Testsysteme GmbH

Managing Director

## Attachment

### Schedule for the discontinuation of the CETATEST x15 series

Standard test devices	Available to order until (Last Call Order)
Leak tester CETATEST 515	March 15, 2024
Leak tester CETATEST 715	March 15, 2024
Leak tester CETATEST 815	March 15, 2024
Mass flow tester CETATEST 615	Expected Q3/2024
Flow tester CETATEST 915	Expected Q3/2024

We also provide information on the current status of discontinued products on the CETA website under [Product Discontinuation](#).

### CETATEST x15 test device variants currently not affected by the discontinuation

- 2-channel leak tester with differential pressure sensor CETATEST 815 TWIN
- 2-channel leak tester with gauge pressure sensor CETATEST 715 TWIN
- Volume flow tester CETATEST 915 LP (Low Pressure)
- Leak tester CETATEST 715 LV (Large Volume)
- 1-channel and 2-channel high pressure leak tester CETATEST 815 HP-PR (High Pressure - Pressure Rise)

As of the current status, these test equipment variants can still be delivered until December 31, 2024.
